Practice Director

Dear Colleague:

Early intervention by a nephrologist can slow chronic kidney disease's progression, manage symptoms and improve the patient's overall quality of life. We understand the pivotal role primary care providers play in the health journey of patients.

We are a private, independent medical practice, and have been serving the community for over 45 years. Our team of board-certified nephrologists and experienced advance practice providers brings years of experience and expertise in managing a spectrum of renal conditions.

We offer an online referral tool to streamline the process for referring patients, as it allows referring providers to send and track referrals electronically. Your staff can access this secure platform to view the status of referral submissions, make new requests, attach documents, and chat with our staff without picking up a phone. Your staff will be able to view any visit notes associated with the referred patient's appointment on the same secure platform.

With persistent short staffing in health care and the need for primary care providers to have timely data for MIPS and other value-based reporting requirements, this tool can assist in meeting these challenges.

The online tool is available by completing the form on this website:

<http://www.phreesia.com/get-connected/>.

We also offer a dedicated **New Referral Fax Line (877) 558-0459**.

Thank you.

NEPHROLOGY
ASSOCIATES OF SYRACUSE, P.C.
